

NIKHIL REDDY CHITTEPU

Full-Stack Developer • B.Tech Information Technology, Final Year (2027) • Seeking SDE Intern / Full-Stack Developer Roles
+91 7995214340 | nikhilreddynikhil988@gmail.com | linkedin.com/in/ch-nikhil-reddy | github.com/Ch-NikhilReddy | nikhilreddy.dpdns.org

SUMMARY

Final-year B.Tech IT student with hands-on experience building and deploying 5+ full-stack applications end-to-end (React, Next.js, Node.js, Express, Spring Boot, MongoDB, MySQL). Strong in REST API design, JWT authentication, and role-based access control. Authored Adaptive Cognitive Firewall (ACF) — an offline-first host security architecture combining rule-based filtering with local ML classifier and a conversational security assistant. Built systems-level projects (custom OS bootloader, language interpreter) beyond web stack. Available immediately for 6-month internships and full-time fresher roles.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, C

Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Zustand, Axios

Backend: Node.js, Express.js, Spring Boot, REST APIs, JWT Auth, RBAC

Databases: MongoDB, MySQL, Data Modeling

Tools: Git, GitHub, Postman, Vercel, Render, VS Code, Leaflet.js

Concepts: DBMS, OS Basics, CN Basics, System Design Basics, Security-minded Development

RESEARCH & SYSTEMS PROJECTS

Adaptive Cognitive Firewall (ACF) — Mini Project, Anurag University | Python, ML Classifier, Host Monitoring | Proposal + Architecture | [Proposal \(Anurag University\)](#)

- Proposed offline-first host security architecture that combines rule-based filtering with a lightweight on-device ML classifier to detect suspicious activity without constant internet.
- Designed feature pipeline from host events (process execution, network connections, file-system behaviour) -> local rules + classifier; low-confidence events optionally query external threat-intel with anonymized indicators and convert response into new local rule for future offline handling.
- Includes locally-run conversational security assistant to explain alerts, blocked activity, and rule changes in plain language — removes need to read raw logs.

Custom OS Bootloader & Language Interpreter — Independent Systems Project | NASM, QEMU, JavaScript/Node.js

- Built bootloader from scratch and a custom programming-language interpreter to explore OS fundamentals and language design beyond web stack.

KEY PROJECTS (FULL-STACK)

Smart Hostel Complaint & Maintenance Management System | React.js, Spring Boot, MySQL, JWT | [github.com/Ch-NikhilReddy/Smart-Hostel](#)

- Full-stack hostel management with role-based access (Student, Admin) and complaint lifecycle tracking (pending → in-progress → resolved).
- Spring Boot REST APIs for complaint CRUD, status workflow, and admin dashboards; MySQL data model for users, complaints, rooms.
- React dashboards with auth guards, responsive complaint tracking, and containerized setup (Docker, Maven).

Civic Issues Portal — Hackathon Winner, MLRIT | React, Tailwind, Leaflet, Node.js, Express, MongoDB | [github.com/Ch-NikhilReddy/civic](#)

- Map-based civic complaint platform with Leaflet geolocation and 3-tier RBAC (User, Admin, Worker) + status tracking.
- JWT authentication and MongoDB models for geo-tagged issues, winning hackathon recognition for execution and problem-solving.

Gas Agency Management System | MongoDB, Express.js, React.js, Node.js | [github.com/Ch-NikhilReddy/Gas-Agency](#)

- MERN gas booking platform with JWT auth, role-based access, booking workflows, COD payment option, and automated email notifications.

Student-Teacher Appointment Booking System | MERN Stack | [github.com/Ch-NikhilReddy/Student-Teacher](#)

- Scheduling platform with secure auth, availability slots, and RESTful MongoDB-backed APIs for appointments and profiles.

Ecoyaan Checkout System | Next.js, React, Tailwind CSS | [github.com/Ch-NikhilReddy/ecoyaan-checkout](#)

- End-to-end checkout flow with Next.js SSR, cart SSR fetching, shipping address validation, and order confirmation UI.

EXPERIENCE

Web Development Intern — Unified Mentor | Jul 2025 – Oct 2025 | Remote

- Built 4 responsive web apps with HTML/CSS/JS; improved mobile usability by 25% via responsive design and component reuse.
- Collaborated in 6-member team with Git/GitHub workflows; reduced merge conflicts by streamlining branching and code reviews.

EDUCATION

B.Tech in Information Technology — Anurag University, Hyderabad | 2023 – 2027

CGPA: 6.78 / 10.0 | Relevant Coursework: DBMS, Operating Systems, Computer Networks, OOPs | **Available: Immediate (6-month internship + Full-time from mid-2027)**

ACHIEVEMENTS & CERTIFICATIONS

- Hackathon Winner — MLRIT College (Civic Issues Portal)
- Web Development Internship Certificate — Unified Mentor
